## PROJECTS

- **RescueLine AI** – Developed an AI powered emergency call triage system using **Twilio**, **ElevenLabs**, and **FastAPI** to automatically classify and route emergency calls by urgency during natural disasters, when traditional helplines are overwhelmed. Built a **real time voice AI agent** and **live dashboard** with **WebSocket** based updates for emergency coordinators managing high call volumes. Earned **1st place and \$700 at Northeastern's Innovate 2026 Hackathon**.
- **LeadCatch AI** – Developed an AI chat assistant powered by **ChatGPT** and **Twilio APIs** to turn missed calls into booked appointments for small businesses. Designed a scalable Python backend for multi user handling and automated SMS based lead conversion. Earned **2nd place and \$1500** in the “Best Startup Demonstrating Traction” category at the **Yconic AI Hackathon (Microsoft, Cambridge, MA)**.

## TECHNICAL SKILLS

- **Backend:** C# (.NET), Java (Spring Boot), Python (Django, Flask, FastAPI)
- **Frontend:** React, Angular, Flutter
- **DevOps:** AWS, Azure DevOps, git
- **Other Programming Languages:** C, C++, MATLAB, R, Go
- **Testing:** JUnit, NUnit, xUnit, Postman, Selenium, k6
- **ML/AI:** TensorFlow, Keras, PyTorch, scikit-learn, Pandas, Numpy, OpenCV, Matplotlib, Seaborn, Plotly, LLMs, Streamlit, GenAI, LangChain, LangGraph, ElevenLabs, RAG, Claude Code, Cursor
- **DBMS:** SQL, MongoDB
